

## MLC Life Insurance – ALUCA – Monash Prize 2017

**Note:** Picture of 2016 MLC Life Insurance - ALUCA - Monash scholarship winner – Christina Zorbas who was awarded \$2500 for her paper on “How could Genetic Screening make Insurance Underwriting easier and what are the Ethical Implications of this?”.

MLC Life Insurance is once again partnering with the Australasian Life Underwriting and Claims Association (ALUCA) and Monash University in Melbourne for the fourth year to offer the MLC Life Insurance – ALUCA – Monash Prize for Industry Collaboration for Health Students.

The prize seeks to build stronger relationships between the Life Insurance industry and Allied Health professionals

by engaging with final year allied health students to research and present on key topics impacting the Australian Life insurance industry, in particular within underwriting and claims.

As part of the scholarship award in 2017, MLC Life Insurance will make a number of resources available to students, including a mentor to help them in their research areas and to provide input and advice.

Like ALUCA and Monash, MLC Life Insurance is committed to the ongoing education of life insurance professionals as well as future talent by helping to raise the standards and professionalism of the life insurance industry.

**Details about the scholarship for this year will be released shortly on ALUCA's website and further details will be provided in the winter edition of RiskeBusiness.**
